## Two (2) types of Heavyweights: **HWT & BHWT** The difference between the two:

**HWT:** Made of 600 Denier 100% Textured Polyester with a urethane coat (DWR) for durable-long lasting wear. Excellent for clean rooms, conventions, etc....

**BHWT:** Made of 1680D Ballistic Nylon is a tough, synthetic basket weave fabric. This heavy duty nylon fabric's abrasion resistance and durable construction make it a top-performing choice for rugged applications where strength and abrasion resistance are a high priority. For those tougher interior construction where fresh concrete surface needs protection.

**BHWT**

**Two (2) types of Heavyweights: HWT & BHWT**  
**The difference between the two:**

**HWT:** Made of 600 Denier 100% Textured Polyester with a urethane coat (DWR) for durable-long lasting wear. Excellent for clean rooms, conventions, etc....

**BHWT:** Made of 1680D Ballistic Nylon is a tough, synthetic basket weave fabric. This heavy duty nylon fabric's abrasion resistance and durable construction make it a top-performing choice for rugged applications where strength and abrasion resistance are a high priority. For those tougher interior construction where fresh concrete surface needs protection.

**\* Always Measurement Required for Proper Fit**

### Two (2) types of Heavyweights: **HWT & BHWT**

#### The difference between the two:

**HWT:** Made of 600 Denier 100% Textured Polyester with a urethane coat (DWR) for durable-long lasting wear. Excellent for clean rooms, conventions, etc....

**BHWT:** Made of 1680D Ballistic Nylon is a tough, synthetic basket weave fabric. This heavy duty nylon fabric's abrasion resistance and durable construction make it a top-performing choice for rugged applications where strength and abrasion resistance are a high priority. For those tougher interior construction where fresh concrete surface needs protection.

# RiggDiapers™

## Made to Fit & Universal

**RiggDiapers™ (RD) *Made to fit Part #*'s**  
Are Listed on The Following Pages:

**Scissor Lifts**.....1 – 2

**Forklifts**.....3 - 9

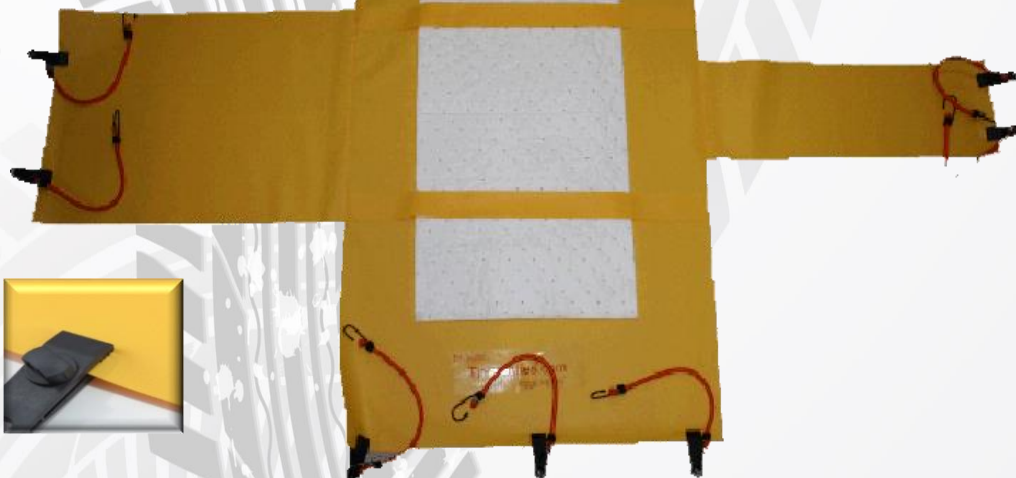

**Boom Lifts**.....10 - 11

**Telehandlers**.....12 - 14

**Note:** (Made to Fit RiggDiapers™ are highlighted in Lt Yellow on pages noted above).

**Provided with made to fit RiggDiapers™**

- 13 oz. Vinyl Laminated cut to fit.
- Bungees
- Clips
- Absorptive Pad (replaceable)

**Clips**

**Bungee**

**Universal RiggDiapers™:** Are cut to measurement and customize on location...

**Provided with the Universal RiggDiapers™:**

- 13 oz. Vinyl Laminated cut to width & length.
- Bungees
- Clips
- Absorptive Pad (replaceable)
- Scissors

**Universal RiggDiapers™ Rectangular Size:**

**Part # Example:**

**RD- 48x60**

48'X60'

48"x72"

48"x96"

72"x96"

96"x120"

120"x144"

144"x240"

# Product Information

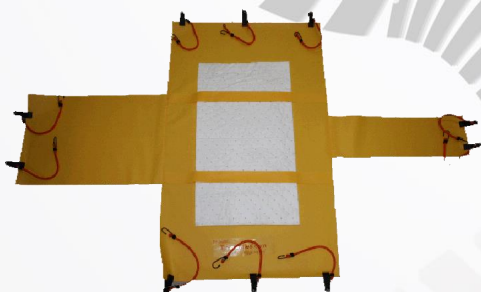

**HWT / BHWT TireBooTies®** booties are made for tougher interior applications and used on heavy equipment like forklifts, scissor lift, boom trucks, etc. all having to enter a building and the need to protect the surfacing.

We Offer Two (2) types of Heavyweights: **HWT & BHWT**

**HWT:** Made of 600 Denier 100% Textured Polyester with a urethane coat (DWR) for durable long lasting wear. Excellent for clean rooms, conventions, etc....

**BHWT:** Made of 1680D Ballistic Nylon is a tough, synthetic basket weave fabric. This heavy duty nylon fabric's abrasion resistance and durable construction make it a top-performing choice for rugged applications where strength and abrasion resistance are a high priority. For those tougher interior construction where fresh concrete surface needs protection.

**RiggDiapers™** providing "bumper to bumper-Drive Wheel to Counterbalance protection" RiggDiapers™ provides complete undercarriage coverage. No longer drips, leaks or mechanical mishaps leave spot reminders of presence & neglect. The diapers fit under the machine and then are secured with bungee cords. Once secured properly, pesky leaks fall onto the diapers and then onto the absorbent pad thus protecting your surface.

Our unique design features bungee cords attached with clips – NO grommets to rip out and NO magnet to slip off with vibration. You can place the clips anywhere on the diaper for a more secured and adjustable application. Diapers include a removable oil absorbent pad soaking liquid and held in with diaper straps for easy adjustment and replacement..

**ForkBooTies™ (FB)** are designed to your fork dimensions. Constructed with our BHWT (Ballistic Heavyweight) exterior material and layered interior with our laminate for extra durability. Easy on and off with our bungee and clips. The 8" long vertical tong is attached with high tension Velcro for the option of removing if not needed. They are tough and offer total protect from damaging your cargo.

**Outrigger StabilizerBooTies™ (OSB)** are designed to your outrigger dimensions. Used to protect floor surfacing. Constructed with our BHWT (Ballistic Heavyweight) exterior material and layered interior with laminate for extra durability.

**LWT TireBooTies®** protects the flooring from harsh weather conditions and scuff marks tires can make. The covers are made from a 100% spunbound polypropylene non-woven fabric which is water repellent and. The fabric is heavier weight than the shoe cover fabric for durability and a longer lasting reusable lifetime. It's a simple process of placing the cover over the tire with the elastic band. Simply start at the top of the wheel then rotate the wheel and continue to wrap the elastic until the whole diameter of the tire is covered evenly. It's a secure and tight fit giving the ease and freedom to move in any direction. When leaving the premise simply remove the cover and throw it in the washing machine for re-use.

*It's Cost Effective, Simple, Fast to Apply and Clean!*

The **LWT Casterbooties™** fabric is heavier weight than the shoe cover fabric for durability and a longer lasting reusable lifetime. It's a simple process of placing the cover over the wheel with the elastic band and fastening with the Velcro on each side. Booties are quick to install and provides quiet easy unrestricted use of operation.

CasterBooTies™ are durable, water repellent and washable allowing for economical and reusable solutions vs. expensive housekeeping, cleaning, repairs and maintenance.

**CasterBooTies™** are also available in **HWT & BHWT** fabric from wheel/tire size 6" diameter and up.
